

# Bullyard Renewable Energy Project

## You're Invited!

Come and meet the team from **European Energy Australia**. We are building the Bullyard Renewable Energy Project, 44km west of Bundaberg between Bullyard and Bucca. We are hosting **drop-in sessions** to share information and get your input.

### GIN GIN COMMUNITY CENTRE

(4 DEAR STREET, GIN GIN)

Thursday 5<sup>th</sup> February  
Anytime between 9:00am – 11:30am

*Second event currently being confirmed and will be advertised shortly through the website.*

The Power of Tomorrow,  
Today!

The **Bullyard Renewable Energy Project** is a 97 MW solar farm, with plans to potentially add a battery energy storage system. Located 44 km west of Bundaberg, Queensland, the project received approval in 2024. Construction will start mid-2026 and is expected to take 6–12 months.

Community benefits funding is available for community priorities, including environmental, social, infrastructure, sponsorships, and donations. The project will create about 150 jobs during construction, 8–10 ongoing roles for operations and maintenance, and support local procurement.

## Location

The Bullyard Renewable Energy Project is located at **143 Gastons Road** and will produce **97MW** of green energy per year.
